

Short informative videos from the Anticoagulation Forum by leading VTE experts. In less than 12 minutes you will have a thorough overview of practical approaches for treating patients with VTE and an insight into the most current issues and treatment protocols.

DOAC Therapy Can Be Reversed!

Topics Covered

- DOACs are effective and safe
- Management of bleeding on DOACs
- Reversal agents: Characteristics of an ideal reversal agent; Reversal agents available and in development; Clinical indications
- Case example

Discussion Questions

How and when do you assess bleeding risk for patients on DOACs?

How do you discuss bleeding risk to your patients who are initiated on DOAC therapy?

Do you currently have protocols to manage patients on DOACs who experience bleeding?

How would you manage patients on FXa inhibitors and FIIa inhibitors with major bleeding in the future?
