

Short informative videos from the Anticoagulation Forum by leading VTE experts. In less than 12 minutes you will have a thorough overview of practical approaches for treating patients with VTE and an insight into the most current issues and treatment protocols.

Managing the DOACs

Topics Covered

- Evolution of anticoagulant therapy
- Ideal candidates for DOACs
- Monitoring vs. measuring
- Interruption of therapy
- Inpatient-outpatient transition/follow-up

Discussion Questions

How do you determine if a patient is an ideal candidate for a DOAC?

What strategies do you use if you wish to measure the effect of a DOAC?

How do you manage a patient on a DOAC who needs an invasive procedure?

How often do you follow your patients on DOACs? What do you monitor, if anything?

David A. Garcia MD
Professor of Medicine
University of Washington School of Medicine,
Seattle, Washington, USA
