

In less than 12 minutes, you will have a thorough overview of the evolving standards of care for VTE management and practical considerations for appropriate selection of anticoagulant therapy.

Treatment of Venous Thromboembolism: Changing the Standard of Care

Topics Covered

- Current standard of care for VTE
- Efficacy and safety of DOACs
- Drug attributes (Warfarin vs. DOACs)
- Advantages of DOACs
- DOAC patient selection criteria

Discussion Questions

How do you present DOACs as the preferred choice to your patients?
At what point do you consider switching a patient from warfarin to a DOAC?
What safety information do you communicate to your patients who are taking any of the oral anticoagulants?
